new! **microfiber**

Cleaning Solutions

A completely new cleaning system that saves money, time and labor.

CARLISLE
make**work**easier

Micro Fiber

Carlisle's complete line of new Microfiber products can save you significant time, money, and labor compared to traditional cleaning tools. Whether your cleaning tasks call for mopping, dusting, washing, or polishing your work will be easier, faster, and simply better using this truly superior longwearing professional equipment.

- unique ultra-fine filament combined with our exclusive Polyester/Polyamide Nylon blend cleans better and lasts longer than other microfibers; still provides effective cleaning after more than 500 uses (use & launder)
- mops and cloths remove up to 400% more dirt, dust, and grime with a single pass compared to traditional cleaning products
- because they simply clean better themselves, Carlisle microfiber products can significantly reduce your chemical usage in a broad number of common cleaning tasks
- incredibly long product life could save you as much as 60% per year over the cost of traditional alternatives

ENVIRONMENTAL BENEFITS

Additionally, Carlisle's Microfiber products have many environmentally beneficial attributes:

- hypo-allergenic
- lint free
- non-abrasive
- low cube

WHY MICROFIBER?

In general, microfiber cleaning tools are a superior alternative to traditional materials because they simply clean better. Individual strands of material stand-up from the surface like tiny flexible bristles. When pressed against anything, they flatten out into broad cleaning surfaces with multiple edges to collect and hold dirt. This means you have far more surface coverage with each pass, dramatically increased cleaning power, and virtually eliminating the problem of re-depositing dirt onto a surface you just cleaned. Carlisle's unique microfiber material also has the added benefit of having smaller, more densely packed strands and tight-woven backings for even better cleaning action. This exceptionally tough material is also extremely gentle, non-abrasive, hypo-allergenic, and completely lint free. So, when we've packed more than a half-century of cleaning expertise into our Microfiber system, the question really becomes "Why aren't you using Carlisle Microfiber?"

Micro Fiber

GENERAL CLEANING

Our full line of Microfiber products make covering a broad range of common cleaning tasks - from daily wet and dry floor care, to cleaning and polishing glass, marble, and other delicate surfaces - easy. And with products that can last more than 4-times longer than what you're using now without losing any of their cleaning power, you'll find you're saving a lot of money on replacements too.

HEALTHCARE

Nowhere is thorough cleaning coupled with strict contamination control more important than in Healthcare environments. Carlisle's Spectrum® color-code system provides an easy self-monitoring system for zone isolation/segregation to prevent infection and other pathogenic transmission from room to room during both normal daily cleaning and post procedure decontamination. As part of a conscientiously applied strict cleaning regimen, Carlisle's Microfiber system can help significantly reduce the chance of cross-contamination in Healthcare operations.

FOODSERVICE

From front of the house, to back of the house, and even rest room maintenance - Carlisle's Microfiber cleaning system offers you a number of advantages over common cleaning tools in foodservice environments. And your staff will appreciate getting better results with less effort. Spectrum® color-coding supports easy to train HACCP programs while our exclusive material gets virtually any ordinary prep surface or service area gleaming in no time.

CLEANING SOLUTIONS – WET MOPPING

The superior cleaning action of our Microfiber material ensures more thorough removal of microbial contaminants from hard non-porous surfaces with less risk of transference, even when just rinsing with clean water. Wet floor mops have a unique microfiber fill instead of foam. They dry faster and more thoroughly than common rags and rag mops – reducing the potential for encouraging bacterial, mold, and mildew growth inside the very tools you are supposed to be cleaning with.

MICROFIBER WET MOPS

- greater surface contact combined with more cleaning power for superior results; can be used for dry mopping/dusting
- eliminates the need to mop the same area over and over again
- special looped-end fibers glide over floors for easier mopping, no linting
- fast drying time
- available in 5 Spectrum® colors for HACCP programs
- colors: Blue(14), Green(09), Red(05), White(02), Yellow(04)

CLEANING SOLUTIONS – DRY MOPPING

Our unique Microfiber wet mops can just as easily be put to work as a triple-duty all-round cleaning tool. Use wet to thoroughly wash walls, ceilings, and other vertical or hard to reach surfaces. The pivoting head means you can get just about anywhere dirt can. Used dry by itself, our mop picks-up and holds dust, cobwebs, and fine dirt overhead too. Or, you can switch out the standard mop for a disposable dust cloth for quick touch-ups anytime – both fit on the same mop head!

MICROFIBER DRY MOPS

- ribbed center mat attracts and hold dust like a magnet
- large looped fringe keeps dust from flying; grabs larger particles and debris
- unique design polishes hardwood, marble, terrazzo, and other smooth surfaces as you dust
- colors: Blue(14)

CLEANING SOLUTIONS – HAND TOOLS

Carlisle's selection of dry cloths, mitts, and sponges make cleaning virtually anywhere quick and simple. You'll also find that switching to Carlisle Microfiber means you can use less spray cleaners, polishes, and chemicals for the same jobs you do now, and get even better results.

MICROFIBER CLEANING/POLISHING CLOTHS

- keeps surfaces gleaming without sprays and chemicals
- super-tough terry cleaning cloths work better and last longer than cotton rags; microfiber loops hold dirt and grease - won't redeposit; rinse clean and dry fast
- 36334 is available in 5 Spectrum® colors for HACCP programs
- colors: Blue(14); 36334 also in Green(09), Red(05), White(02), and Yellow(04)

36334
